Summary

I'm a Full Stack Web Developer. I have experience working in teams and in multidisciplinary projects with a strong leadership and planning skills.

I'm a lover of new technologies and I consider myself self-taught. Established reputation as a problem-solver, team leader, software architect, and agile practitioner. Generally, my decisions are data driven, I always try to think strategically to provide long-term vision and translating business problems into effective technical solutions.

I'm really lucky to dedicate myself to do what makes me happy, programming is both my job and a hobby. I'm a strong believer that trust, values, teamwork and a great communication are the keys to achieve great results.

I'm Always looking for the next challenge, learning, trying new things and looking to improve my skills and maturing further my proficiency.
